

Dear Builders/Contractors.

31.10.2022

The following items on the agenda was discussed and agreed upon.

1. We request that the following should be done on all active building sites before the 15th of December 2022 when we will be closing for the holidays.
 - a. All building sites must please be enclosed with a 40% green or black netting with a max 1.5 high with 100mm gum poles tightened with wire top, middle and bottom to secure your building sites, for those sites that have boundary walls we request that these sites must be closed in front of the entrances so that nobody can have access to the sites.
 - b. all toilets must be emptied and locked and can be kept on your sites, skips and paper bins should be removed from all sites to eliminate people from dumping and using your equipment with personal and household dirt.
 - c. All building rubble to be removed from all sites (fines will be issued if this is not actioned) to make the Estate look like an Estate.
 - d. All building sand must please be covered at the end of every day to minimize it blowing in the neighbourhood (if this is not actioned, fines will be issued as of Monday the 8th of November 2022)
 - e. All builders' huts to be locked and secured for the December holidays.

Any questions regarding the above, please contact me.

Kind regards

Selwyn Brickles

Building inspector SPBE.
